ABSTRACT

This articulation report from the Florida Community College System provides headcount statistics for those undergraduate students in Florida's State University System (SUS) who, prior to enrolling in their respective universities, were enrolled in Florida's 28 public community colleges. Tables 1, 2, and 3 display by gender, race, and age, respectively, the frequencies of headcount enrollments of undergraduate students attending the SUS in the fall term where the college of last attendance was a Florida community college. Table 4 shows students in the fall terms classified by date of entry into their respective university. Table 5 shows students classified by number of semester hours transferred to the particular university. Tables 7 and 8 show the distribution of students by the university at which they registered in the fall 1996-98 terms and the community college from which they transferred. Table 9 shows that most community college students earned a grade point average (GPA) of 2.5 or higher while enrolled in the SUS. Tables 10-13 display students transferring both prior to and after earning 60 semester hours. Table 14 shows the number of students enrolled in each major field of study. Finally, Table 15 reflects the full 1996-97 year GPA performance of community college students with an associate in arts degree versus native university students. Appended are lists of community college presidents, independent colleges and universities of Florida articulation officers, community college articulation officers, university presidents, and university articulation officers. Articulation in Florida

Articulation is the means by which schools, colleges, and universities coordinate their programs and services to facilitate the movement of students through the educational system. Articulation is especially critical to the success of Florida's postsecondary education system, which is based on the two-plus-two concept, of the first two years of undergraduate work in a community college and the final two in a university. Florida is considered a leader in the nation in developing highly effective articulation at the state and local levels between and among institutions and sectors.

In 1957, a report entitled "The Community Junior College in Florida's Future" was approved by the State Board of Education. The report outlined the orderly development of a statewide system of community colleges, clearly designating these institutions as the entry point for students beginning their postsecondary education. Before 1957, Florida had three universities and four community colleges. The General Education Agreement guaranteed the transfer of all general education credits from a public community college to a state university. This agreement also prohibited the universities from requiring any additional general education courses if a student had completed a general education program at a community college.

During the rapid growth that followed, four universities were opened without a lower division and the other five had severe limitations placed on lower-level enrollments (hence, the two-plus-two system). Between 1957 and 1972, twenty-four new community colleges were opened, bringing the total to twenty-eight. This expansion of the postsecondary systems spurred the development of a new articulation agreement.

From this foundation, a number of other programs, systems, and activities have emerged, which serve to enhance the two-plus-two articulation system. This includes programs such as: common college and high school transcripts, dual enrollment programs, the designation of articulation officers at both the public community college and state university levels, the College Level Academic Skills Program, computerized academic advisement systems, program reviews, common course numbering, common prerequisites, and a host of other activities. These enhancements reflect Florida's public educational institutions commitment toward the equitable treatment of transfer students and to the success of the two-plus-two system.

Articulation Report

This Articulation Report presents descriptive headcount statistics for those undergraduate students in Florida's State University System (SUS) who, prior to enrolling in their respective universities, were enrolled in one of Florida's twenty-eight public community colleges.

The Articulation Agreement, Rule 6A-10.024, Florida Administrative Code, facilitates the transfer of students from community colleges to the universities. That agreement also encourages the SUS and the Division of Community Colleges (DCC) to cooperatively conduct longitudinal research on community college transfer students. It is in this spirit that the Articulation Report has been produced by the DCC since 1973. In 1974, the SUS established the Student Data Course File, which contains records of all students enrolled in the universities.

Sufficient information is provided for the reader to compare groups that are of interest. Only brief comments will be made on the data contained in the various tables. Note that beginning in the Fall 1997 data for Florida Gulf Coast University are displayed.

Tables 1, 2, and 3 display by gender, race, and age respectively, the frequencies of headcount enrollments of undergraduate students attending the SUS in the Fall term where the college of last attendance was a Florida community college.

Table 4 shows students in the Fall terms classified by date of entry into there respective university.

Table 5 shows students classified by number of semester hours transferred the particular university.

Tables 7 and 8 show the distribution of students by the university at which they registered in the Fall 1996-98 terms and the community college from which they transferred. Percentages in Table 7 are for percent of transfers **TO** that **university** (columns) whereas in Table 8 the percentages are for transfers **FROM** that **community college** (rows). For example: In the Fall of 1998, 33% of **the community college** transfers **TO** the Florida State University were from Tallahassee Community College. As compared to Table 8 showing that of the students who transferred **FROM** Tallahassee Community College into the SUS 82% of them transferred to the Florida State University. Table 8 indicates that the largest percentage of students who transfer from a community college tend to enroll in the nearest university.

Table 9 shows that most community college transfer students earned a grade-point average (GPA) of 2.50 or higher while enrolled in the SUS. GPA is based on a 4.0 system that is calculated by dividing grade points earned by semester hours attempted.

Table 10 displays two types of former community college students enrolled in the 1996-98 Fall terms: students transferring prior to earning 60 semester hours and students transferring after earning 60 semester hours or more. Because cumulative GPA refers only to academic course work at a particular institution, the cumulative GPA shown in Table 10 does not include the grades earned at the community college. Data for previous years are not shown, but are available in prior editions of the Articulation Report. Table 11 shows SUS totals for the same cohort by Community College for 1996-98 Fall terms. Those students who have no transfer hours but do have an AA or AS for the highest degree granted from a Florida Community College have been moved to the greater than 60 hours category in Tables 11 and 12.

Tables 12 and 13 present the same data as Tables 10 and 11 except that each N (enrollment) represents the total from a particular community college.

Table 14 shows the number of students enrolled in each major field of study for each university and for the system during the 1996-98 Fall terms. Each major field of study is divided into two subgroups: students earning a GPA of 2.00 or higher and students earning a GPA lower than 2.00. Mean GPA for each group is reported in the final column.

Table 15 reflects the full 1996-97 year (Summer 96, Fall 96, and Spring 97 terms) GPA performance of community college students with an associate in arts degree versus native university students classified as upper division. Table 15 represents a SUS summary. As such, students are classified in slightly different major categories than in Table 14. This may cause difficulty in making cross comparisons.
